Ceramic Ventilated Cladding - KERATWIN K20

Since 2008, Ceragres Tile Group inc. distributes the KeraTwin® K20 ceramic ventilated cladding system in Canada. Manufactured by Agrob Buchtal in Germany, this system has been successfully employed around the world. The ceramic panels (available in over 150 standard colors) are perfectly resistant to the environmental challenges of our Nordic climate and will not suffer any discoloration due to UV rays. To find out more about projects executed with the K20 system in Canada, visit www.ceragres.ca/en/products/ventilated-cladding/ or contact a Ceragres Tile Group expert.

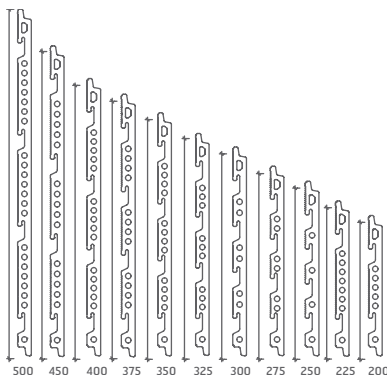

- 1 CERAMIC PANEL
 - more than 150 standard colors
